1 Datacenter 2.5.0

Release Date: 2025-11-03

These are the release notes for Datacenter version 2.5.0. This document describes the user-visible changes that have been made to the software since Datacenter 2.4.0.

1.1 New Features

- DCE-77: The file reader data provider was extended to support XML files.
-

1.2 Improvements

- DCE-69: Improved logging when using the Tracab data provider.
 - DCE-80: Improved browser cache handling, which removes the requirement of manually deleting the browser cache on version updates to get the latest UI changes.
-

1.3 Fixed Issues

- DCE-67: Fixed issue with the Sportec data provider, which was not correctly handling cases where Sportec returned only one result for a request (for example, when the selected competition had only one match).
 - DCE-70: Fixed the memory leak when disabling an output and the receiving process was not reachable.
 - DCE-71: Fixed issue where Datacenter became unresponsive when the Tracab data provider was used, but Viz Arc was not running.
 - DCE-72: Fixed issue where activated add-on licenses disappeared in the license configuration.
 - DCE-78: Fixed issue where an error was shown when adding a new Dataset without a script.
 - DCE-84: Fixed several memory leaks and UI performance issues.
-

1.4 Known Issues

- Stats Perform authentication fails when the server used to fetch time on the Datacenter machine differs by more than 60 seconds from the time of the Stats Performs servers (RZT-12115).
 - When having an active streaming dataset (for example, Tracab or Socket listener), the interaction with entries of other datasets (for example, adding a manual entry or copying an existing entry's value) may be hindered due to too frequent data updates (RZT-12200).
-

1.5 Licensing

Datacenter 2.5.0 requires a WIBU V3 software license.

2 Installing Datacenter

2.1 Install New Software (Required)

The setup file *VizDatacenter-2.5.0.2749.msi* installs all required files to run Datacenter. The installation requires the following steps:

2.1.1 Step 1: Remove Existing Datacenter Versions (Optional)

- Remove any existing installation of the Datacenter (recommended).

2.1.2 Step 2: Install Datacenter

Info: Running the Datacenter 2.5.0 installer requires Admin privileges.

- Locate the file *VizDatacenter-2.5.0.2749.msi* and double click it.
- Follow the steps on screen and click the **Install** button when finished.

2.1.3 Step 3: Verify Datacenter's Installation

- Make sure you have a valid Datacenter V3 WIBU license.
- Navigate to <http://127.0.0.1:5700> or double click on the Datacenter Desktop icon.
- You should land on the following view (the Datasets list may be empty for a brand new installation):

2.2 Project Compatibility

Datasets created with versions older than 2.0.0, are not compatible with Datacenter 2.5.0.

2.3 Compatibility Notes

Datacenter 2.5.0 is compatible with:

Product	Version
Windows	Windows 10
Viz Engine	4.4.1 or newer
Viz Libero	8.2.0 or newer
Viz Arena	5.3.0 or newer
Viz Arc	1.7.0 or newer

3 Documentation

Documentation for Datacenter is available at the [Vizrt Documentation Center](#):
