# 1 Viz Channel Branding 5.4.0

**Release Date:** 2025-06-26

These are the release notes for Viz Channel Branding version 5.4.0. This document describes the user-visible changes that have been made to the software since release 5.3.1.

---

## 1.1 New Features

- Housekeeper can now sync creation of playlists and any playlist content.
  - Housekeeper can clean out campaign-related pages for automatic clean-out from MCR channels by setting the TTL field in the Page pool.
  - Housekeeper and client UI now support *Approval Workflow* for pages, most commonly used in push of pages from Planning department to MCR department.
- 

## 1.2 Improvements

- Page Editor now has support for a dynamic representation of Control Container.
  - Database connection dialog now has the ability to select the driver to use, based on which ODBC drivers are installed.
  - Harris (Imagine) Integration Module now compatible with 2.0 of the Service interface.
  - Housekeeper Configuration section now has improved messages to explain errors found and how to solve them.
  - A clip added from Clip Bank with metadata extracted from Viz One now has the metadata also added into the Playlist element.
- 

## 1.3 Changed Features

- Filter menu and dialog administrator options improved, the edit and delete options is also removed from built-in filters.
  - Channel selector no longer allows selection of channels that mismatch in version, instead informs the user that a upgrade of the channel is needed first.
- 

## 1.4 Fixed Issues

- No longer possible to sidestep the Save button being disabled when naming a page that could allow for a badly named page being created.
- When trying to edit a page with an illegal name, the user is now asked to save it under a new name.
- Client application will not try to recalculate the start-time of Dayswitch-control elements when in External Triggering playout mode.

- Quick Take panel functionality reimplemented, after being disabled in the transition to the new client UI in the previous versions.

---

## 1.5 Note About Installer Naming

All installers have had a slight adjustment to their naming, the Bundle installer is now changed from *ChannelBrandingBundleInstaller-x64-5.x.y.z.exe* to *VizChannelBrandingBundle-x64-5.x.y.z.exe* and individual installers are changed from a pattern of *VizChannelBranding\_CC-x64-5.x.y.z.exe* to *VizChannelBrandingCC-x64-5.x.y.z.exe* where CC is the component name.

---

## 1.6 Recommended System Requirements

- Windows 10 64-bit (only)
- Microsoft .NET Framework 4.8
- Media Sequencer 5.6 or higher
- Viz Engine 5.3 or higher
- Graphic Hub REST 2.4.2 or higher
- Media Codecs (K-lite Codec Pack full)

While Windows 10 is the recommended operating system for this release, the solution has been tested to work equally well with Windows 11.

 **Note:** Codecs are required to preview proxy videos from Viz One. For installation, see the Viz One Integration section in the [Viz Channel Branding User Guide](#).

---

## 1.7 Installation And Upgrade

An *Upgrade Tool* is included in every new version of Viz Channel Branding.

 **IMPORTANT!** The **Upgrade Tool** that ships with Viz Channel Branding **must be used** to upgrade/update **any** Viz Channel Branding channel data to the latest version.

To upgrade Viz Channel Branding channel data for each version, follow the instructions below.

### 1.7.1 All Versions of Viz Channel Branding

The Viz Channel Branding Upgrade Tool is located at *C:\Program Files\Vizrt\Viz Channel Branding\Upgrade Tool\*. This utility *must* be used to perform any upgrade/update of the channel data.

#### To upgrade Viz Channel Branding

1. Navigate to *C:\Program Files\Vizrt\Viz Channel Branding\Upgrade Tool\*.
2. Double-click the program to open it.
3. Fill out *Media Sequencer IP address* or *hostname*.

4. Click **Connect**. A list of existing channels is displayed. Channels in the list that can be upgraded are shown with an **Upgrade** button.
5. To begin, click **Upgrade**.
6. **Upgrade Status** becomes *Fully Upgraded* when the upgrading process is completed.

## 1.7.2 Migration

### To migrate from Viz Multichannel to Viz Channel Branding 5.x+

1. Uninstall previous version.
2. Install Viz Channel Branding 5.x+ component 'Upgrade Tool'.
3. Run 'Upgrade Tool' and 'Migrate' and then 'Upgrade' appropriate channels. This is a two-step process, first the data migration, then a final data-upgrade pass.

 **Note:** For further details, please refer to the [Upgrade and Migration](#) section of the latest *Viz Channel Branding User Guide*.

### To migrate legacy Viz Multichannel older than 2.6.2

- Refer to the [Upgrade and Migration](#) section of the latest *Viz Channel Branding User Guide*.

---

## 2 Documentation

Documentation for Viz Channel Branding is available at the Vizrt Documentation Center:

- [Viz Channel Branding User Guide](#)

---

## 3 Support

Support is available at the [Vizrt Support Portal](#).
