1 Mosart Web Apps 2.4

Release Date: 2025-07-09

We're thrilled to announce the launch of **Web Applications 2.4**, packed with exciting new features, polished designs and productivity-enhancing improvements.

We value your insights and encourage you to share your feedback, feature requests or comments, to help us continue to innovate.

1.1 Template Editor - Early Access

Introducing the long-awaited new Template Editor: for easier, faster and more powerful template management.

This first version demonstrates the new way to navigate, create, visualise and edit Viz Mosart templates, with an initially limited set of switching and audio fader commands.

The new Template Editor works with your current template files, and will save changes in the same format. This lets you evaluate the new, web-based solution in parallel with the legacy editor (accessed through AV Automation).

Warning: This is an Early Access version covering limited functionality, designed for testing and evaluation. Until official release, it is *not* supported for production use.

1.1.1 Timeline view

Understand at a glance everything that will happen at *cue*, *take* and *take out*, including delays, transitions etc.

1.1.2 Quick navigation

Find templates fast with the familiar interface also used in the NRCS Plugin.

1.1.3 New command model

Easier to get started, thanks to a unified list of control and device commands. The number of commands are now reduced, with each command delivering greater flexibility.

1.2 Config Tool

1.2.1 Authentication

It is now possible to add authentication to your Mosart Web Applications, with [an OpenID Connect provider](#).

1.2.2 Clip attributes

This version introduces the ability to specify which [clip attributes](#) (for example, *name* and/or *description*) are displayed in the web application.

1.3 Showmaker

- Fixed a bug with showing the wrong thumbnail on Pilot data elements ([MOSART-13578](#)).
- Fixed a bug with editing of Pilot data elements not working ([MOSART-13540](#)).

1.4 NRCS Plugin

- Fixed a bug with inheritance in combination with shared gallery breaking the edit workflow ([MOSART-13530](#)).
 - Fixed a bug related to duplicated newsroom tags ([MOSART-13522](#)).
-

1.5 Timing Display

- Fixed a bug where the Rundown Elapsed Time sometimes showed wrongly ([MOSART-13606](#)).
-

1.6 Installation And Upgrade

- **Installation:** To download this version, please visit the Vizrt FTP site at download.vizrt.com and navigate to */products/VizMosart/Latest Version/WebApplications/*.
 - **Upgrade:** The installer manages the upgrade, automatically removing older versions of **Vizrt Mosart Web Applications** and **Vizrt Mosart Web Applications Configuration Tool** before installing the new package. Remember to *close* any running version of the Vizrt Mosart Web Applications Configuration Tool before upgrading.
-

1.7 System Requirements & Documentation

- Ensure compatibility with Windows 10, Windows Server 2022, and latest Chrome/Edge for a seamless experience across all Web Applications.
- **NRCS Plugin:** Works with any version of Viz Mosart. NRCS Plugin with Viz Pilot Edge requires Viz Pilot Edge 3.1 or later.
- **Timing Display:** Viz Mosart 5.0.3 or later.
- **Rundown Viewer:** Viz Mosart 5.1.0 or later.
- **Showmaker** (early access): Viz Mosart 5.7.0 (MOS 4.0 support introduced) or later.
- **Template Editor** (early access): All versions of Viz Mosart.

User guides are accessible within each application. Latest insights and instructions are continually updated to [the Vizrt Documentation Center](#).

2 Support

Support is available at the [Vizrt Support Portal](#).
